

To: All NTN Site Operators
Subject: Site ID Barcode Labels for NTN Samples

Every year the Central Analytical Laboratory (CAL) mails out a new series of Site ID barcode labels. Start using the new labels when they are received, older sets of labels can be discarded. Please check the labels to be sure that they match your site ID and that there are four sheets enclosed.

As a reminder, use two MATCHING labels per sample submitted. If there is no bottle, for example, from a dry week, then place the label on the back of the dry sample return envelope. (See the photo below.) Use the labels in ascending numerical order for each sample you submit. If a sample is missed, continue to use the labels in order. If there would happen to be two samples in one week, use two sets of labels that week.

Place the left barcode label on the FORF and the matching right barcode label on the outside of the bottle bag or on the back of the Dry Sample Envelope.
